

Zain Noor

University of Waterloo B.A.Sc Management Engineering 2023

Email: zain.noor@uwaterloo.ca

GitHub: github.com/zainnoor99

Website: zainnoor.me

SUMMARY OF QUALIFICATIONS

Languages: JavaScript, Java, Python, HTML/CSS, R, VBA

Tools: Node.js, React, React-Native, Firebase, Redux, WebdriverIO, Mocha.js, Sion.js, Chai.js, Junit

Project Management: Agile – Scrum, Jira, Confluence

EXPERIENCE

Manulife Financial

Software Engineering Intern

Waterloo, Canada

Jan 2020 – April 2020

- Worked with a small sub team on an investment tool for financial advisors using **React**, **Node.js**, and **Redux**
- Collaborated with the business team to deliver features, bug fixes, and improvements that enhanced the business value of the tool
- Created new and converted old Selenium automation and regression tests using the **WebdriverIO** framework
- Live coded and demoed an **InnerSource** create-react-app template to the Vice President of Core Engineering and Transformation and proved the ease of building webpages that met organizational standards

Elastic.io

Software Engineering Intern

Bonn, Germany

May 2019 – Aug 2019

- Increased Magento component usage by Implementing features to deal with post purchase data in **Node.js**
- Revamped Filter component by adding support for **JSONata** expressions and error assertion functionality making it simpler and easier to use
- Pared down backlog by **10%** working on bugs and implementing new features
- Created rigorous unit/integration tests using the **Mocha** testing framework, **Chai** assertions, and **Sinon.js** fakes

First Robotics

Team Captain

Mississauga, Canada

Nov 2016 – Jun 2018

- Led a team of 20 students made up of sub teams including Strategy, Mechanical, Electrical, Design, and Programming to the Ontario District Championship placing **36 out of 156** in Ontario
- Mentored 12 junior members and set up four of them to become team leads
- Modeled autonomous maneuvers for programming team to implement resulting in an autonomous mode with over a **95%** on target accuracy

PROJECTS

Project X – Work in Progress

- Built a **React-Native** Android app that allows users to showcase projects with a simple and easy to use UI
- Integrated **Firebase authentication** to authenticate users to the app with their email and passwords
- Utilized **Cloud Firestore** as a database to track user info such as id's, usernames, projects, etc.
- Managed app state with **Redux**, allowing for data to be easily passed between components
- Currently the app features signup/login, profile and projects view, and adding projects functionality
- Future features will include search by username and a **chat system** to allow users to interact

Web Apps – Viewable on GitHub

- Developed notes, to-do list, and hangman web apps which utilize **localStorage** for data persistence and the **Fetch API** to make requests to an endpoint, using JavaScript
- Implemented callback functions, arrays, and objects to control **DOM** and **JSON** elements
- Utilized **async/await** to handle promise resolution/rejection, allowing code to run asynchronously

Meme-Survival – Viewable on GitHub

- Applied **Object-Oriented-Programming** principles and developed a birds-eye view shooter with the **libGDX** framework in **Java**
