zain.noor@uwaterloo.ca | +1 (647)-702-9281 | zainnoor.me | linkedin.com/in/zainnoor99 | github.com/zainnoor99

SKILLS

Languages: JavaScript, Java, Ruby, Python, HTML/CSS, R, VBA

Technologies: Node.js, React, Ruby on Rails (RoR), React-Native, Redux, Firebase, Mocha, Junit

Tools: Git, Jenkins, Cloud Foundry, WebdriverIO, Sinon.js, Chai.js

Project Management: GitHub/GitLab, Agile (Scrum), Jira, Confluence

EXPERIENCE

Manulife

Remote | Sep 2020 - Dec 2020

Software Engineering Intern - Full Stack | **Node.js, React, Redux**

- Designed and implemented new accessibility (**WCAG 2.0** compliant) features into the Customer Portal, actively used by more than **100,000 users**
- Collaborated with Technical Program Managers and Senior Product Owners to identify an **AODA** compliant layout for production release
- Refactored code base from node-fetch to **Axios** and updated **8+** unit test suites using **Jest** and **Axios** mocks, verified API endpoint responses using Postman
- Supported the Co-op Hiring Committee by screening **100+** resumes and conducting 3 interviews alongside an Engineering Director to recruit new talent for the 2021 co-op program

Manulife

Waterloo, Canada | Jan 2020 - Apr 2020

Software Engineering Intern - Full Stack | **Node.js, React, Redux**

- Developed an **automated investment tool** using **React** for the frontend, **Node.js** for the backend, and **Redux** for state management, aiding financial advisors across Canada in managing customer investment portfolios
- Created regression tests using **WebdriverIO** for QA team, reducing **2 days** of manual testing to less than **30 minutes** of automated testing
- Secured approval for company-wide rollout by demoing **InnerSource** product to senior leadership team, including **VP** of Core Engineering and Transformation at Manulife

Elastic.io

Bonn, Germany | May 2019 - Aug 2019

Software Engineering Intern - Backend | **Node.js**

- Implemented new Magento component features in **Node.js** to handle post purchase data from the Opensource e-commerce platforms API endpoints, expanding user base by **10%**
- Rebuilt Filter component with **JSONata** support and error assertion, enhancing functionality while simplifying flow which increased its usage by **60%**
- Created rigorous unit and integration tests using the **Mocha** testing framework, **Chai** assertions, and **Sinon.js** fakes to increase test coverage and application robustness

PROJECTS

Project X

- Worked on a **React Native** mobile app MVP that allowed users to showcase projects with an intuitive UI
- Integrated Google's **Firebase** platform to store user data and to authenticate emails and passwords

Online Boggle

- Built an online web game version of the popular word game Boggle with **React** and **Node.js**
- Implemented rooms system with **Express** and **Socket.IO**, enabling users to play in real time with other players
- Managed app state with **Redux**, allowing data to be easily passed between components

EDUCATION

University of Waterloo B.A.Sc - Management Engineering

Sep 2018 - Apr 2023

- Course Work:** Principles of Software Engineering (**Ruby, RoR**), Introduction to Machine Learning (**R**), Databases and Software Design (**Ruby, RoR, PostgreSQL**), Algorithms and Data Structures (**Java, JUnit**)
