

ZAIN NOOR

zain.noor@uwaterloo.ca | +1 (647)-702-9281 | zainnoor.me | linkedin.com/in/zainnoor99 | github.com/zainnoor99

SKILLS

Languages: JavaScript, Java, Ruby, Python, R

Technologies: Node.js, React, Ruby on Rails, Redux, Express, Cypress, TestCafe, WebdriverIO, Sinon.js, Next.js

Tools: Git, Jenkins, CircleCI, Jira, Confluence, Heroku, Postman

Databases: PostgreSQL, MongoDB, Firebase, Mongoose.js

Leadership: First year engineering coach, WE Accelerate software mentor, FIRST Robotics Team Captain

Achievements: Attained outstanding evaluation consecutively on previous three co-ops

EXPERIENCE

reebee

Apr 2021 - Aug 2021

Front End | **JavaScript, React**

- Revamped flyers bookshelf component with react-window, reducing large scale rerenders and page reload speeds by **30%**
- Migrated Cypress to TestCafe headless integration tests, decreasing end to end test script run time by **60%**
- Boosted Google search ranking by applying various search engine optimization techniques
- Improved overall app performance by lazy-loading components to defer initialization
- Logged events and sent data to analytics team by constructing a logger function for URL clickthroughs

Manulife

Sep 2020 - Dec 2020

Full Stack | **Node.js, React, Redux**

- Implemented new Web Content Accessibility Guidelines 2.0 features for **100,000+** active users
- Collaborated with Technical Program Managers and Senior Product Owners to design and release new Accessibility for Ontarians with Disabilities Act compliant Customer Portal layouts
- Restructured API utils file from node-fetch to Axios, leveraging built in JSON data transformation functionality and eliminating legacy callback functions, minimizing file size and refining code readability

Manulife

Jan 2020, Apr 2020

Full Stack | **Node.js, React, Redux**

- Developed an automated investment tool with React, Node.js, and Redux to aid financial advisors across Canada in managing customer investment portfolios
- Created WebdriverIO testing suite to reduce **2 days** of manual testing by **98%**
- Secured approval for InnerSource product rollout by demoing to leadership team and VP of Engineering

Elastic.io

Back End | **Node.js, Sinon.js**

May 2019 - Aug 2019

- Refactored Magento component to add support for automatically generating invoices; Expanding component adoption by **10%**
- Enhanced filter component functionality with JSONata support and error assertion, simplifying data flow and increasing component usage by **60%**
- Created rigorous unit and integration tests using the Mocha.js testing framework, Chai assertions, and Sinon.js fakes, raising test coverage and application robustness

EDUCATION

University of Waterloo

B.A.Sc | **Management Engineering**

Sep 2018 - Apr 2023

Relevant Courses

- Principles of Software Engineering, Introduction to Machine Learning, Databases and Software Design, Data Structures and Algorithms
