EXPERIENCE

Elastic.io

Software Engineering Intern

Bonn, Germany
May 2019 – April 2019

- Implemented feature to create order invoices and to set orders as shipped in Magento using JavaScript and Node.JS
- Refactored Filter component to make use of JSONata expressions and added error assertion functionality in order to filter JSON data
- Pared down backlog by 10% working on bugs, issues, and implementing new features
- Created unit and integration tests to ensure functionality of components using Mochas testing framework, Chai's assertion library, and Sinon.JS

First Robotics

Team Captain

Mississauga, Canada
November 2016 – June 2018

- Led a team of 20 students made up of sub teams including Strategy, Mechanical, Electrical, Design, and Programming to the Ontario District Championship placing 36 out of 156 in Ontario
- Mentored 12 junior members, setting them up to take on future leadership roles, out of which four went on to become team leads
- Modeled autonomous maneuvers for programming team to implement resulting in one of the most consistent autonomous modes across all teams with over a 95% on target rate

PROJECTS

Write Up – write-up.netlify.com

- Created a web app which allows users to save, delete, and re-order notes
- Utilizes asynchronous function calls in JavaScript, allowing the code to be run in a specific order
- Implemented functions, callback functions, arrays, and objects/classes using JavaScript to control DOM and JSON components

Second Guesser – second-guesser.netlify.com

- Created a hangman game which allows users to guess a puzzle by inputting letters from their keyboard using JavaScript
- Leverages the Fetch API in JavaScript to generate random puzzles for the player

Meme-Survival – View on GitHub

- Created a birds-eye view shooter using Java in which the user must eliminate memes to survive
- Applied object-oriented-programming principles to hold ammunition and hearts in arrays and to spawn enemies

SKILLS

- JavaScript, HTML/CSS
- Java
- Python

TOOLS

- Eclipse, VS Code, WebStorm
- ZenHub
- Git

EDUCATION

University of Waterloo

Candidate for BSc in Management Engineering

September 2018 – April 2023
